# TREMOLO BIO

Tremolo Lights' sound is a blend of warm, beach vintage rock, modern synth pop, with dreamy harmony rich vocals that has been compared to contemporary acts such as Tame Impala, Tennis, and Foster the People. The band formed in late 2017, when singer/guitarist Stacy Cole had a vision, and met drummer/producer Fabian Peña.

Shortly after, they met keys/synth player/singer Sean Embrey-Stine, and bass player/singer Rachel David, and began combining vocal harmonies, adding a new dimension and quality to the sound. They began playing shows in Los Angeles, and released their first single, "Afterglow" in the summer of 2018.

Tremolo Lights is set to release a 4 song EP, performed by the band and produced by drummer Fabian Peña, in February of 2019.
